

Clinical Risk Management Program

In addition to our compliance services, we have a similar clinical risk management service that allows your workforce to report issues and concerns to your clinical leadership. This is an essential element of malpractice prevention.

The risk management services include the basic elements of a clinical risk program:

Lines of communication

- Reporting system
- Communication with counsel
- Communication with leadership

Policies

- Sample policies
- Customizable policy templates

Response to Reports

- Responding and investigation
- Support for staff during and after incidents
- Bring resources, research, and project management skills to solve problems

Training

- Training and development around top known risk areas

Monitoring and Auditing

- Identify trends and action plans with leadership

Just Culture

- Supporting leadership/human resources as necessary

Additional add-on services available to purchase outside the core package:

On-site risk assessments

Root cause analysis after an incident for process improvement

Grievance management

On-site committee and/or board meeting attendance
